PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Tempesses W. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Rallroad Comanies, and the public to examine Itesuperiority over other ARCHITECTS AND BUILDERS should not fail to tier, etc. ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and chesper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, elastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, sinc, cepper, or from roof—it making no difference how steep or flat they may befor seven doflars per one hundred square feet, it being far chesper than any Roof of the old six e, and we are sure it will give better satisfaction.

will give better satisfaction.

It will also be found to be the best saing ever invented to It will also be found to be the best to ng ever invented to cover or mend old leaky tin, tar and gravelroofs, or around chimneys, southly definer windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long assatone, and form a perfect adherious to any object to she's it is applied. The Roofs can be canned over (and severanted not to leak) at two d hars and fifty cents. (and sarranted not to leak) at two d liars and fifty cents per-hondred square feet, which is cheaner and and a better than pair. This Roofing will be found to be the best thing for covering large stoofs where they are exposed to for such as five a Mills, Saw Mills, Factories, Reifrond Cars, Bridges, Depots, Station Bouses, Steamoust Becks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint n it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

20 Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure buildings with Roofs covered with this Cement, at the same tates as for those covered with fron, Copper or Tin

21 The Cement will be furnished to those at a distance with directions for using.
